| NL | Benodigd gereedschap |
| D | Benötigtes Werkzeug |

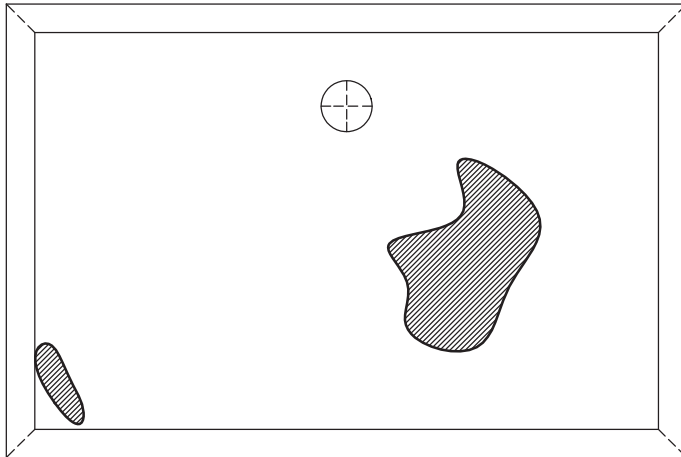

Utiliser un silicone adapté au matériau de chaque support (faïence, acrylique, etc.)

Gebruik siliconenkit die geschikt is voor iedere ondergrond (tegelwerk, acryl, etc.)

Für das jeweilige Trägermaterial (Stein, Acryl usw.) geeignetes Silikon verwenden

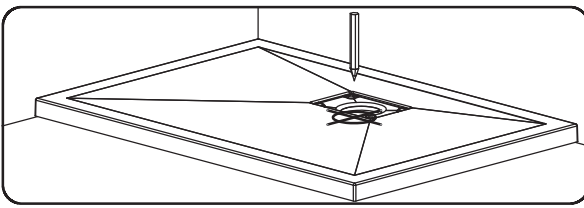

- F** D'éventuelles irrégularités de surface sur le dessous de votre receveur n'empêchent pas une installation conforme aux préconisations de pose. La colle (type MAP, polyuréthane ou MS polymère) comblera facilement ces manques lors du collage.
- NL** Eventuele onregelmatigheden in de vlakke onderzijde van uw douchebak vormen geen belemmering voor een installatie conform aan de gestelde richtlijnen. De lijm (type MAP, polyurethaan of MS-polymeer) vult eventuele openingen makkelijk op tijdens het lijmen.
- D** Eventuelle Unregelmäßigkeiten der Oberfläche an der Unterseite Ihrer Duschwanne haben keinen Einfluss auf die Installation gemäß den Einbauempfehlungen. Der Klebstoff (Typs MAP, Polyurethan oder MS-Polymer) gleicht diese Unebenheiten beim Verkleben problemlos aus.

- F** Aspirer le dessous de votre receveur avant la pose
- NL** Stofzuig de bodem van de douchebak voor de installatie
- D** Saugen Sie den Boden der Duschwanne vor der Installation ab

F

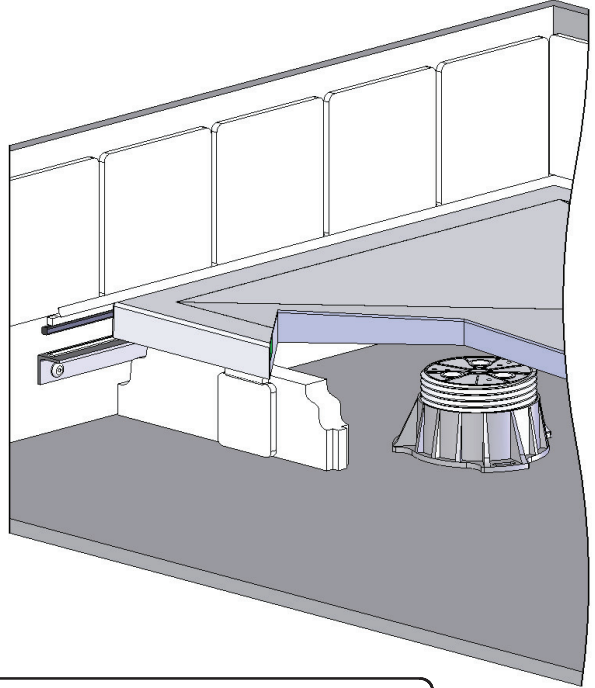

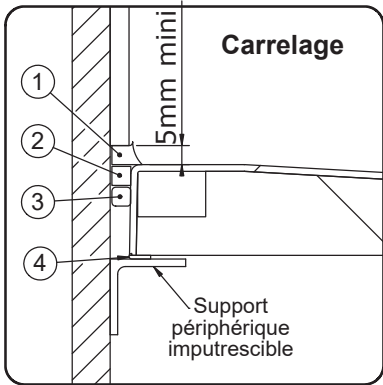

Tracer la position de la bonde et réaliser un montage à blanc de la bonde et du receveur

Le receveur ne doit subir aucune modification (sciage, meulage de renfort...) autre que celles prévues par le fabricant.

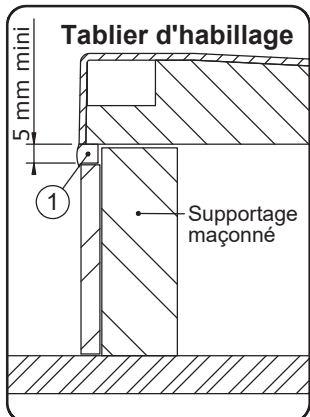

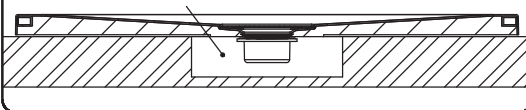

- ① - silicone de finition traité antifongique de 5mm de largeur minimum
- ② - silicone d'étanchéité souple traité antifongique
- ③ - élément de soutien du joint silicone
- ④ - silicone d'appui

Il est indispensable d'avoir un support imputrescible sur tous les côtés du receveur.

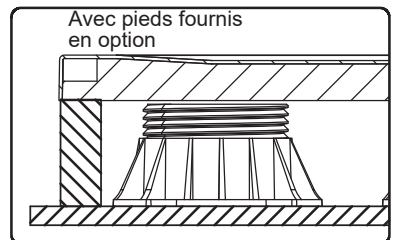

Pose directe au sol ou encastrement bord à bord

Prévoir une zone de bonde plus basse que le sol

Supportage du fond

Avec pieds fournis en option

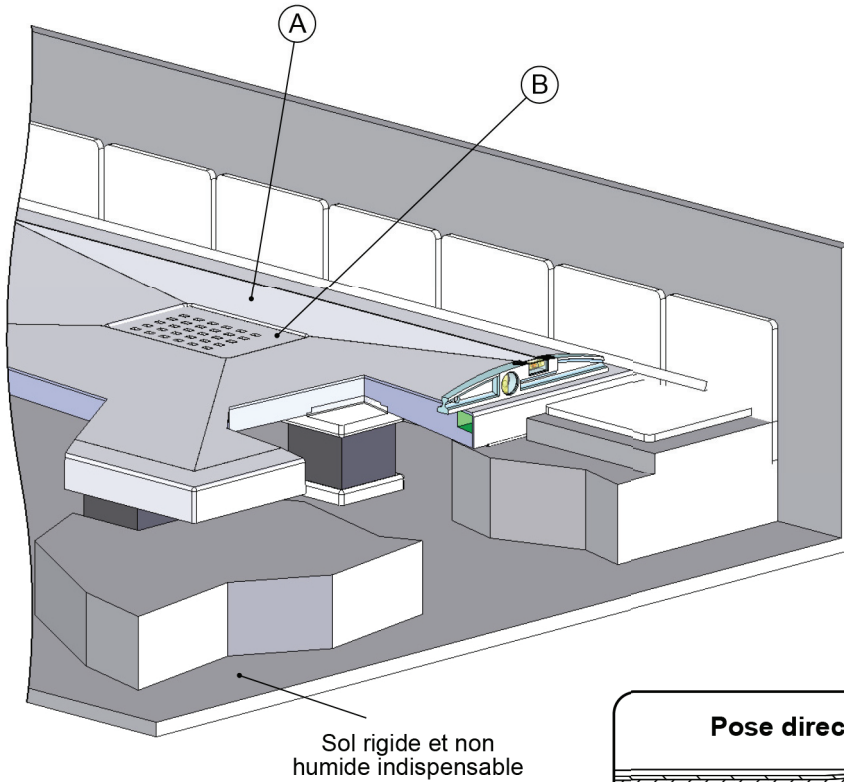

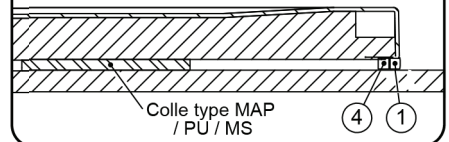

Pendant toute la durée des travaux, protéger le receveur contre toute agression : brûlures, chocs, rayures, décapants...

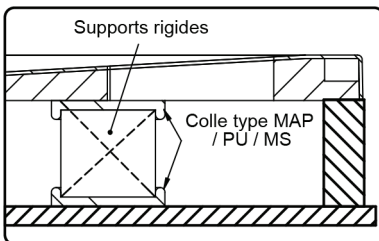

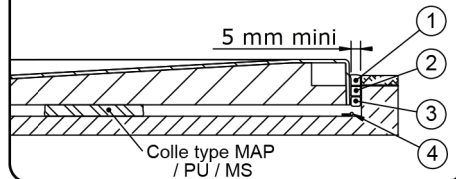

Le montage d'une *soupape anti-vidé* est nécessaire pour une utilisation optimale si un autre appareil sanitaire est raccordé sur la même évacuation.

Pose directe au sol

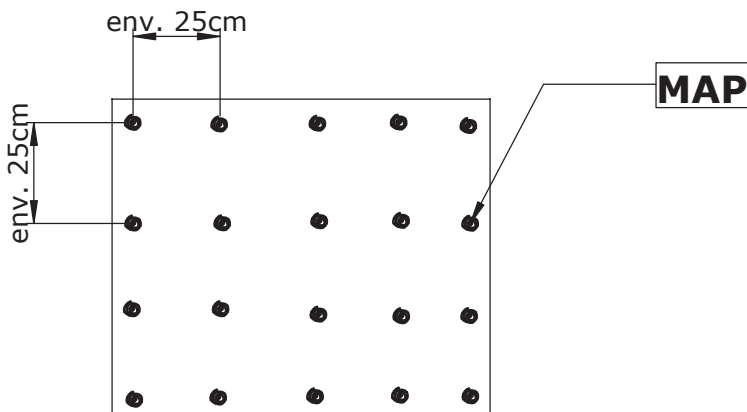

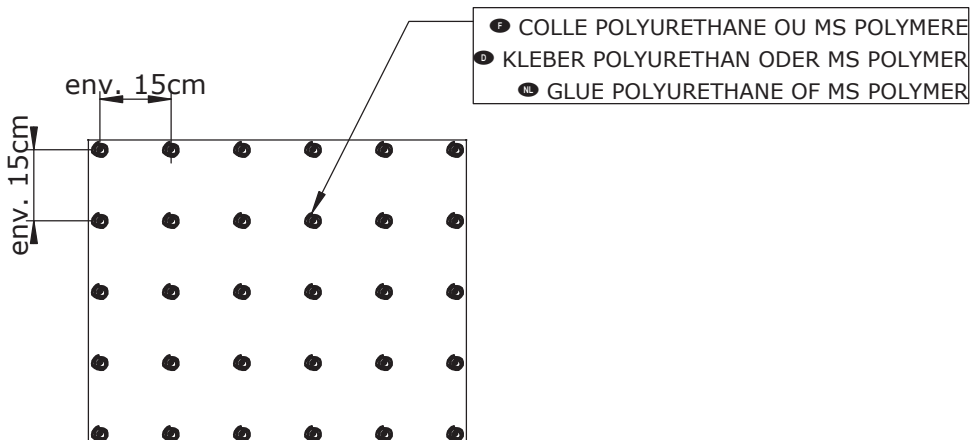

Encastrement bord à bord

Préparation de l'implantation

3. Encastré et posé sur pieds réglables

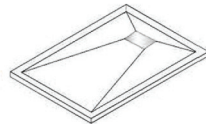

Préparation de l'implantation

4. Encastré et posé sans pieds réglables

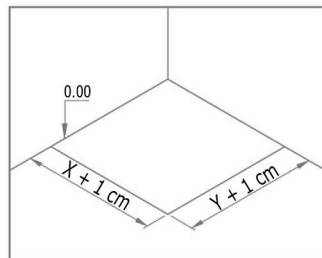

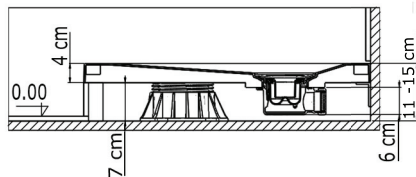

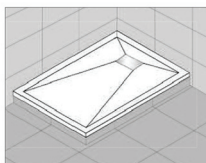

Préparation de l'implantation

Markeer de positie van de afvoer en bepaal de plaats van de afvoer en de douchebak

Voer geen aanpassingen uit aan de douchebak die niet zijn voorzien door de fabrikant (zagen, slijpen)

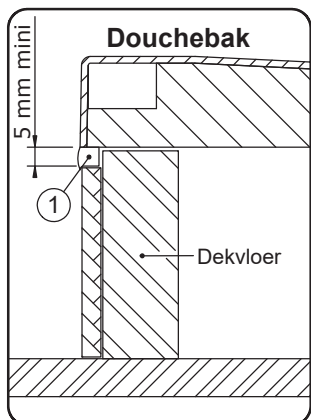

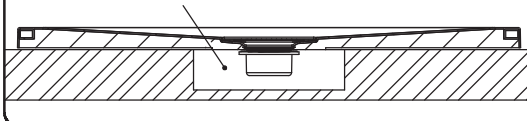

- ① - Schimmelwerende siliconenkit met een lengte van minimaal 5mm
- ② - Siliconenkit voor een waterdichte afwerking, met schimmelwerende werking
- ③ - Steunelement van silicone pakking
- ④ - Siliconen ondersteuning

Breng een schimmelwerende afdichting aan, langs alle zijden van de douchebak.

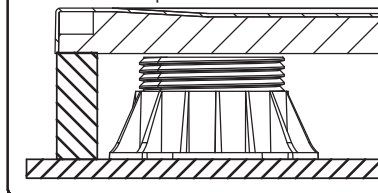

Installatie op de vloer

Voorzie een afvoerhoogte in de vloer

Versterking van de ondergrond

Optioneel geleverd inclusief stelpoten

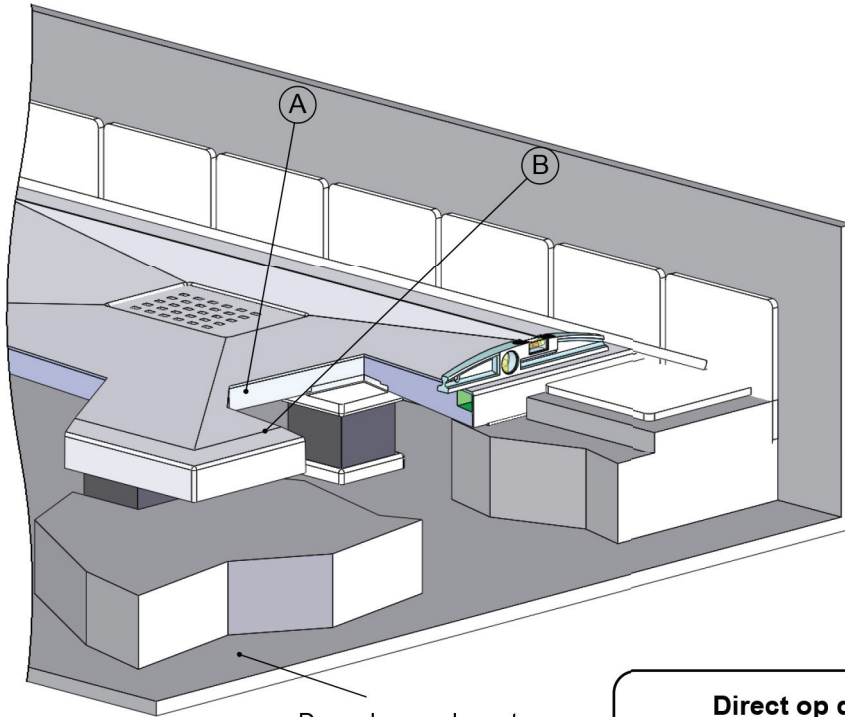

Bescherm de douchebak tijdens de werkzaamheden tegen brand, schokken, krassen etc.

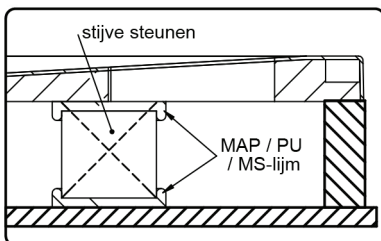

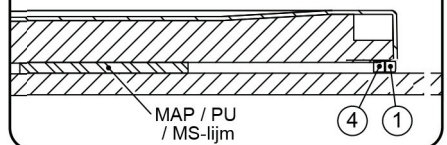

Voor een optimaal gebruik is de montage van een terugslagklep noodzakelijk indien een ander sanitair toestel wordt aangesloten op dezelfde afvoer.

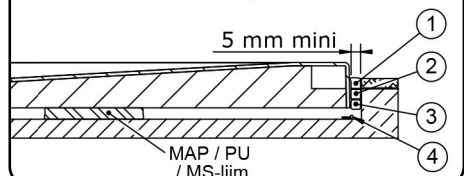

De ondergrond moet volkomen vlak en droog zijn

Direct op de grond

D

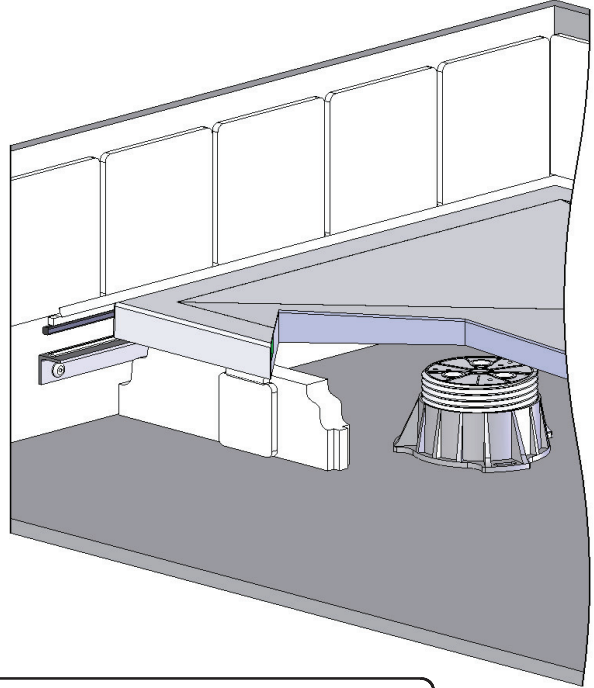

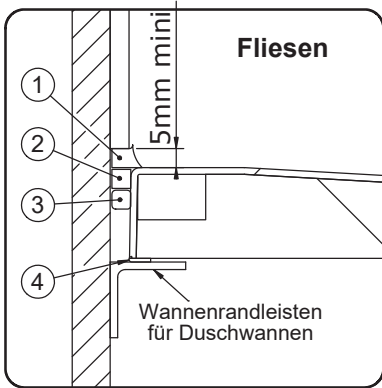

Die Position für den Ablauf anzeichnen und vormontieren

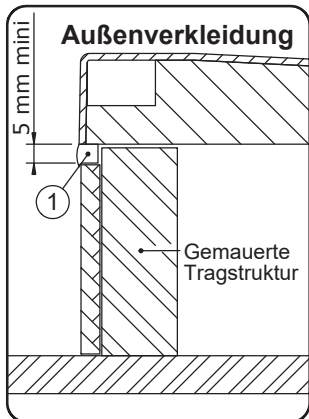

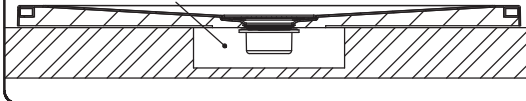

Die Duschtasse darf in keiner anderen als vom Hersteller vorgesehenen Art und Weise verändert werden (durch Sägen, Schleifen etc.)

- ① - Pilzhemmendes Silikon mit einer Mindestbreite von 5mm
- ② - Weiches pilzhemmendes Dichtsilikon
- ③ - Stützelement der Silikondichtung
- ④ - Sanitärsilikon

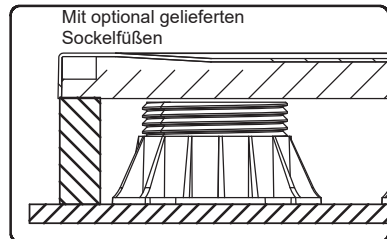

Montage direkt am Boden oder bündige Einbettung

Für den Ablauf eine Aussparung unter dem Boden vorsehen, Mindesttiefe 70mm

Rückwärtige Tragstruktur

Mit optional gelieferten Sockelfüßen

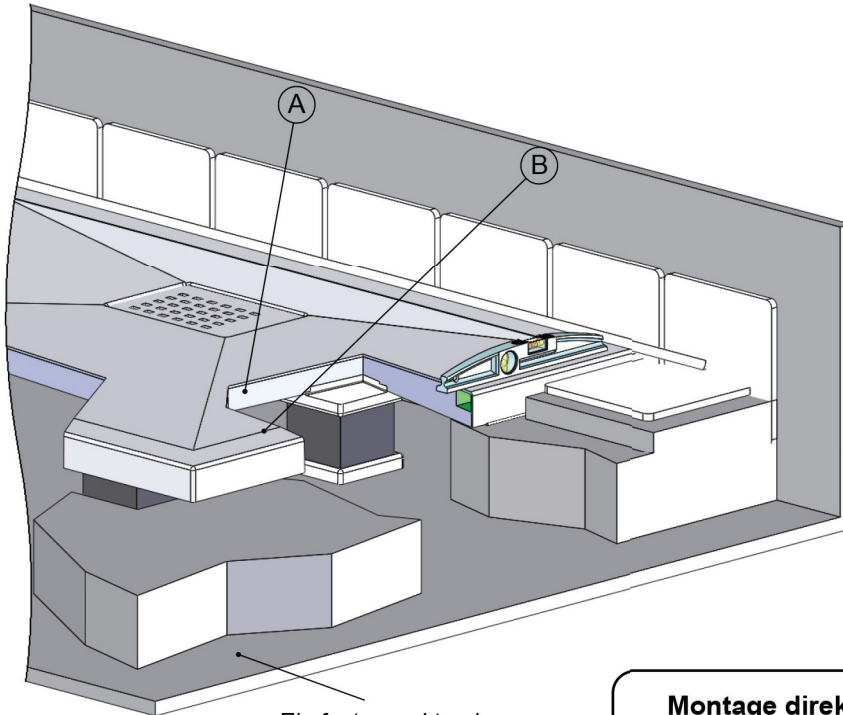

OD

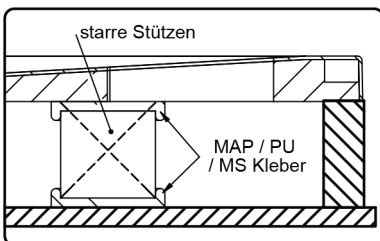

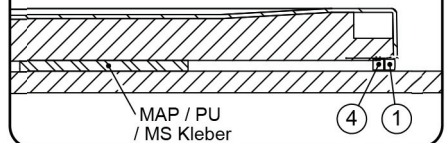

Montage eines Anti-Vakuum-Ventils
ist notwendig für die Verwendung
optimal, wenn ein anderes Sanitärgerät
ist mit der gleichen Evakuierung verbunden.

Während der gesamten Dauer
der Arbeiten ist die Duschtasse
vor allen möglichen
Beschädigungen zu schützen

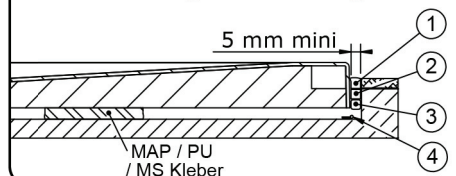

Ein fester und trockener
Untergrund ist unabdingbar

Montage direkt am Boden

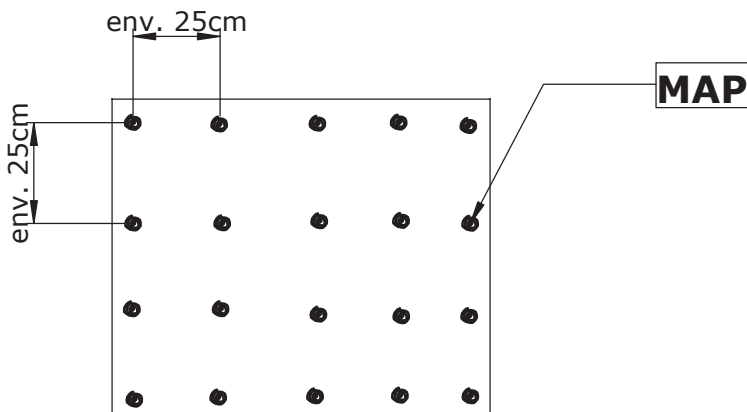

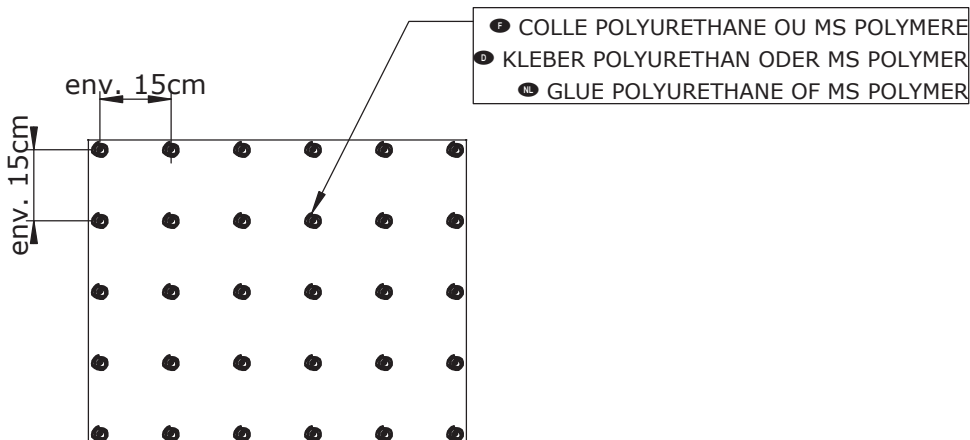

Bündige Einbettung
